Common Core State Standards Implementation Support 2013-2014

Regional Common Core State Standards Math Workgroups

In an effort to re-design professional learning experiences to align with research and best practices, this workgroup is one of several supports for schools and districts that will be offered by Olympic ESD over the three year standards transition period. Contact us for information on other supports we are offering this year to support your transition.

Our vision is that each district will build a cadre of mathematics leaders who can support district implementation efforts and ensure that all teachers in all schools are well prepared to implement the Common Core State Standards.

Goals
- Develop a deep understanding of the CCSS Math standards & the new Smarter Balanced assessments.
- Develop district and building mathematics leadership teams that can support the implementation of the new standards.
- Develop a common vision of the strong connections between CCSS Math and new teacher and principal evaluation criteria and instructional frameworks.
- Share, find and create resources with other district math leaders in the region.

Audience
School and district level mathematics teacher leaders and administrators.
- 2012-2013 Members are encouraged to return to continue to build your knowledge & skills.
- New members are welcome!

We recommend districts send a team that can work together to build district mathematics leadership and support district implementation efforts.

2012-2013 Key Learning
- CCSS Math Overview
- 8 Standards for Mathematical Practice
- Smarter Balanced Assessments
