To generate a calendar with weather symbols from NOAA:

1. Head to https://www.wunderground.com/history
2. For location, type: Bremerton, then select “Bremerton, Washington”
3. Don’t worry about the date, just click on “submit”
4. Click on “Calendar”
5. Now, you can select the month and year you want. This will generate a sheet you can print and hand out to the students to use in Investigation 4.1 if the class data is difficult to reproduce, or missing data.

There may be some discussion about symbols used that are different from those the class used. Specifically: Partly Sunny, Mostly Cloudy, Scattered Clouds, etc. These are all variations of Partly Cloudy.
