Investigation 2: Grass and Grain Seeds

Plants are living things and have structures.

There are many different kinds of plants.

- Ryegrass
- Wheat
- Alfalfa

Plants have basic needs: water, light, air, nutrients and space to grow.

Plants grow and change.

There are many ways to get new plants

- Seeds grow into plants

Plants make their own food.

People and other animals eat plants for food.

Individuals of the same kind of plant are similar but can vary.
