When scientists share their own ideas, they may say:

- I observed that ___________________
- I noticed that ___________________
- My data shows ___________________
- I think ____________ because __________
- I wonder ___________________

When Scientists respond to others, they may say:

- Can you explain to me _______________?
- Why do you think _______________?
- What evidence do you have ___________?
- Are you saying _______________?
- I agree with ______ because ________
- I respectfully disagree with _______________ because ___________
When scientists share their own ideas, they may say:

I observed that ____________________
