The Cooperative aims to:

- **provide** a consistent level of service and expertise across the region to school districts within the co-op;
- **foster** a common framework and shared approach in coordination, and execution of the emergency management strategies and common command structures;
- **“co-op”** resources to reduce duplication of efforts and training cost to district; and
- **assist** districts and schools to be better prepared.

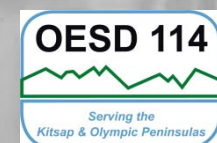

“There isn't anything more important than the safety of our students, staff and families.”
