

Staff Health Appraisal

- **All Head Start /ECEAP staff must submit an initial physical exam (or documentation of one recently completed within 90 days of employment).**
- **Tuberculosis Test (TB) results must be obtained by the Early Learning Department prior to working with children.**
- **The TB test results can be completed by the provider using this form or be completed by Kitsap Public Health District. Tests completed by KPHD will be billed to the Head Start/ECEAP program using the attached KPHD TB form.**

Physical Exam

Staff Member _____

Position _____

Exam Date _____

As shown by physical examination, the above-named staff person is in good health, free from communicable disease and able to perform all functions related to working with preschool children and their families.

Examiner _____

Please indicate here if this individual has any health condition(s) which might affect her/his work role, interfere with the health of others, or prohibits the staff member from providing adequate care for children _____

Tuberculosis Test

Unless medically contraindicated, and prior to contact with children, each Head Start/ECEAP employee shall show evident of a negative (TB) skin test by Mantoux method, obtained within the previous 12 months.

This individual is free from communicable tuberculosis as shown by:

- ____ negative PPD test results read on (date) _____
- ____ positive skin test followed by one negative x-ray and asymptomatic history
