ABOUT WESTERN REGIONAL INFORMATION SERVICE CENTER (WRISC)

WRISC staff supports the use of the Skyward Fiscal/HR and student records applications by 21 school districts and the Suquamish Tribal Education Department.

2014-2015 Program Outcomes

- The student support analyst team converted student data for Insight Schools of WA from *Powerschool* into the Quillayute Valley School District Skyward database.
- At the same time they configured the database and converted student data into a new database for the Suquamish Tribal Education Department.
- Training was provided to staff of both organizations. As a result, their systems were active in time to meet OSPI reporting requirements at the start of the school year.
- We assisted the Suquamish Tribal Education Department in submitting their first S-275 personnel report to OSPI.
- From September through May, support analysts:
 - resolved 4,725 support requests
 - delivered 97 trainings to 951 participants
 - responded to 95 consultation requests
- Fourteen additional trainings were scheduled June through August.
- Analysts delivered six presentations at the WASWUG 2015 conference and two analysts were invited to present at the fall WASWUG conference in Spokane.
- Student support analysts are partnering with Teaching & Learning staff to ensure districts have access to professional development and technical assistance to implement standards-based grading and progress reports.
